Huntington Beach, CA

## EDUCATION

---

- **California State University, Long Beach** Long Beach, CA  
*Bachelor's of Science in Computer Science* *Sept. 2018 – May. 2021*

## PROJECTS

---

- **MySpotifyInsights**: Collaborated with a team of 3 other developers to develop an app that allows a user to view various statistics about their listening habits provided by Spotify. Utilized React for the front end and Python and Flask for the back end.
- **YelpCamp**: Developed an application that is similar in concept to Yelp, but focuses on campgrounds rather than restaurants. Utilizes Express and Mongo database for the backend and EJS to serve the front end.
- **The Auto Logger**: Designed an application that allows a user to monitor their spending on fuel costs for a vehicle they own. The app utilizes React for the front end and an Express server and Mongo database for the back end.
- **Calculator App**: Constructed an app that functions as a basic calculator stylized with different themes using Sass.
- **Mambo.js**: Part of an open source community that aims to create a new front end Javascript library using native Javascript.

## PROGRAMMING SKILLS

---

- **Languages**: Python, Javascript
- **Technologies**: React, NodeJS, Sass, Bootstrap, EJS, Express, NoSQL(MongoDB)
